January 2016

I would like to start this Allouez Watch News letter thanking our previous Direct Enforcement Officer Rick Loppnow for all his hard work and efforts while serving the Village of Allouez and the Brown County Sheriff's Office as DEO. Rick was recently promoted to Investigative Sgt. for the Brown County Sheriff's Office. Please join me in wishing Investigative Sgt. Loppnow all the best in his new position. I know he will continue to be a valued member in this community in his new role.

I would also like to give a brief introduction about myself. I was born and raised in the southern part of Door County. I have approx. 13 years of law enforcement experience. I started my career with the Dane County Sheriff's Office and then joined the Brown County Sheriff's Office in 2007. For the last 5 years I have been assigned to the Village of Allouez as a patrol officer. I am married and have a 4 year old daughter. My wife is currently a 3rd grade school teacher for the Sturgeon Bay School District. I have met a lot of great people in Allouez and am excited to continue the work Investigative Sgt. Loppnow and Captain Dan Sandberg have done before me.

If there are any needs I can address for you please don't hesitate to ask. I can be reached at 448-2800 ext. 109 or by email vogel_jp@co.brown.wi.us And if I can't answer your question I will be happy to get you in touch with a person that can. I look forward to helping make 2016 a great year for all the Village of Allouez and Brown County residents.

Sincerely,
DEO Jason Vogel

Snowblowers can be easier on your back and save precious time. Unfortunately, the improper use of snowblowers is responsible for almost 6,000 emergency room visits and 1000 amputations per year in the US, as reported by the Center for Disease Control and Prevention.

Individuals that are new to snowblower use or are operating one for the first time of the year are most prone to a snowblower accident. Here are some tips to prevent a snowblower injury;

- **NEVER try to clean the auger or discharge chute with your hand. This is the most common way to be injured by a snowblower.**
 - Keep your hands and feet clear of all moving parts.
 - If you need to clean an auger or discharge chute, shut the snowblower engine off and clear it with the special shovel that some new machines come with or a broom handle, not your hand.
 - Make sure that the discharge chute is aimed away from people and pets.
 - Be careful of hot engine parts such as the muffler that can quickly cause a burn.
 - Never add fuel to a snowblower that is running.
 - Avoid wearing loose clothing such as scarves that could become entangled in the snowblower's moving parts.
 - Never leave your machine running unattended.

Snowblowers are meant to make our lives easier, not to hurt us. Take the extra time this year to use it safely. Your hands, fingers and toes will thank you for it.
