Historical Allouez Society Board and Founding Member
Integrative Community Services, Board Member

Education: Bachelor and Masters in Nursing (BSN, MSN), George Mason University; Fellow, University of Arizona Center for Integrative Medicine

Current Occupation: Adult/Geriatric Nurse Practitioner

Reason for running: Our community must embrace and support families and our aging population. To that end it is essential to protect and preserve the excellent residential nature and historical importance of our community. To pay for these priorities it is also important to remain focused on the continued expansion of the tax base through long range community growth. Total life cycle costs as well as short term issues should govern realistic budget solutions. These fiscal difficulties will require pioneering solutions. I will strive to obtain those solutions.

Allouez citizens deserve crime – free, well maintained neighborhoods. Community safety is vital. I believe this can be preserved with increased residential participation and community based policing. Problem property owners and tenants can be effectively and efficiently managed through ordinance revisions and continued enforcement of existing statutes.

Unique Qualities that make you a top candidate:

I have proudly served as an effective village board member. That experience has given me the detailed knowledge of public works and environmental issues, laws and regulations, and their effect on our community. While proudly representing you, I have fostered positive professional and personal relationships with fellow board members.

3 top issues/concerns regarding the village and proposed resolution:

1. Continued fiscal prudence

Maintain a whole-system approach to issues taking into account total life-cycle costs. While working to maintain excellent community services. Fiscal implications of the pandemic are going to be significant in the coming years.

2. Community identity/cohesion/safety

We must change with the times but it is important to maintain our history and grow in a manner that preserves the values that our community hold dear.

3. Public infrastructure

I will work to maintain our services; not only those that are visible, but also the not-so-glamorous but ever-so-critical infrastructure such as water, sewer and storm water runoff as well.
